## Currently Working on Project

### Exploring Ethical Implications of Artificial Intelligence and Machine Learning Algorithms:

*The ethical implications of developing, implementing, and using machine learning (ML) and artificial intelligence (AI) algorithms are examined in this study field. It looks at problems with algorithmic bias, justice, accountability, transparency, and the effects of AI/ML on society. In order to encourage ethical AI/ML practices across a range of fields, the project investigates case studies, ethical frameworks, and guidelines.*

---
